DETAILED ACTION

Election/Restriction

Applicant elected the synergistic combination of cytarabine and (E)-2'-deoxy-2'-fluoromethylidene cytidine with traverse in Paper no. 4. Applicant's remarks are noted, but the other synergistic combinations will support separate patents. Claims 1-4, 6-8, 11 and 12 read on the elected invention and are being examined. Claims 4-5 and 9-10 do not read on the elected invention and are withdrawn.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4, 6-8, 11 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over applicant's disclosure on pages 1-3 that cytarabine and (E)-2'-deoxy-2'-fluoromethylidene cytidine are each known in the art to be useful in the treatment of patients suffering from a variety of neoplastic disease states. In the absence of a showing of unexpected results no unobviousness is seen in combining the two compounds, since each is known to be useful to treat the same condition.
